E-COMMERCE SYSTEM

The E-Commerce System is an application that allows customers and sellers to trade quickly and easily.

Business Rules:

• System can only be accessed using Internet.

Registration is required to benefit from the following features:

- Add product to basket.
- Make a purchase.

The following must be done so that the registered member can shop:

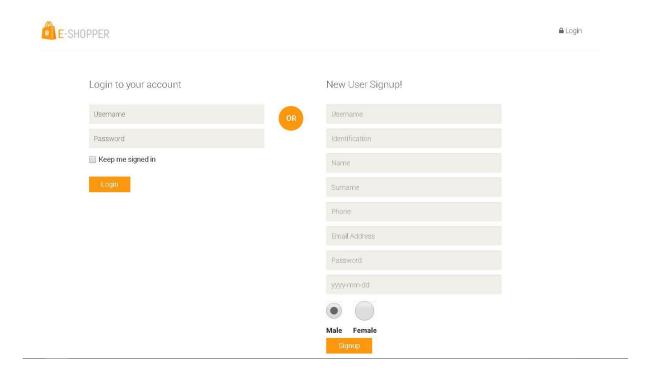

- Add address and communication information.
- Add credit card information.
- Having enough inventory.
- The bank has to approve the process.
